LinkedIn | GitHub | Portfolio

Enthusiastic programmer with experience and strong knowledge of object-oriented programming and application development skills reinforced by programming experience gained through a 16-week immersive full-stack boot camp at DigitalCrafts. Proven self-starter and quick learner with personal drive to expand my knowledge and career in the development field.

SKILLS

Languages: HTML, CSS, JavaScript, Python, PostgreSQL

Frameworks/Libraries: Node.js, Express, Handlebars.js, jQuery, React, Redux, Bulma

EXPERIENCE/EDUCATION

DigitalCrafts | Full-Stack Web Developer   April 2018 – August 2018

- 16-week immersive, full-time web development program
- Worked primarily on the PERN(PostgreSQL, Express, React, Node) stack and intro work with Python
- Recent projects include:
    - Better Day | Front End / Back End   August 2018
      - Developed online journaling and forum site based around preset categories
      - Conducted preliminary research and analysis to ensure a sound project plan
      - Wrote a full stack project using React, Redux, Node.js(express), and PostgreSQL
      - Presented final product to staff and colleagues
    - The Mound | GitHub Repo   April 2018
      - Developed a web application to pull up-to-date baseball stats on players and individual games
      - Collaborated with colleagues to navigate a third-party API in order to integrate information into the program
      - Utilized HTML, CSS, Ajax, jQuery to program the web application
    - C0D3R | GitHub Repo   July 2018
      - Created a web application designed to help programmers discover other programmers
      - Conducted daily stand-up meetings to review project and implementation progress
      - Provided guidance to the team in order to re-allocate time and set direction when necessary
      - Built C0D3R using HTML, CSS, Node.js, Express, PostgreSQL, OAuth
      - Verified user information through GitHub

Campbell Stone Independent Living   2013-2018
Operations/Maintenance Manager

- Managed and maintained all operations processes and teams pertaining to building equipment
- Provided subject matter expertise as the lead on-site telecommunications technician

- Collaborated with management and support staff to create safe and efficient operations processes
- Promoted from entry-level associate to operations manager within 1 year

RaceTrac   2009-2013
Swing Manager
- Promoted from entry-level associate to management within 18 months
- Performed best in class processes in order to prepare new locations for grand opening events
- Responsible for training and mentoring new associates for 12+ RaceTrac locations

Chattahoochee Technical College   2015-2017
Computer Programming Program
